HIGHWAY	MILEPOINT	COUNTY	TOWNSHIP	RANGE	SECTION	TAX LOT #	

General Provisions

The approval and issuance of the Permit to Occupy or Perform Operations on a State Highway (Form 734-3457), allows the undersigned owner of an interest in land adjacent to state highway to manage vegetation and to control noxious weeds on designated ODOT right of way property. An approved Work Plan for the Work Site will be included with the permit along with site specific Special Provisions. The permit does not restrict ODOT's right to access and maintain location for any purpose. ODOT reserves the right to refuse any request for a permit if the location is within a specially managed area or if there are environmental concerns.

ODOT shall provide the Permittee with a liability release form (Form 734-2044). The liability release form shall be completed and signed by the Permittee and returned to the District Manager prior to the performance of any work under this permit.

Permittee shall conduct all work which is the subject of this permit, in compliance with all federal, state, county and municipal statutes and ordinances, and with all regulations, orders and directives of appropriate governmental agencies, as such statutes, ordinances, regulations, orders and directives now or during the term of the permit exist or provide.

No work shall be performed by the Permittee that would in any way restrict the proper functioning of the highway drainage facilities.

Permittee shall not perform any activities within the paved surface of the state highways. Permittee shall use extreme caution while working near the state highway and shall not interfere in any way with the traffic.

Commercial advertising and vending are not allowed on the highway right of way.

All utility companies have the right to install and maintain their pole lines or other facilities within the right of way when authorized by permit. Nothing in this permit is intended to affect the rights of any utility company to conduct such installation or maintenance.

The Permittee shall be responsible and liable for all damage or injury to any person or property resulting from the physical location, installation, construction, maintenance, operation or use of the facility or operation for which the Permittee has been granted a Permit.

During fire season, when using power driven machinery within a fire district, Permittee shall notify Oregon Department of Forestry and shall abide by all fire season tool and equipment requirements.

The District Manager reserves the right to revoke or cancel the permit at any time should the Permittee fail to comply with the terms, conditions, regulations and provisions contained herein.

The term of the Permit is one calendar year from January 1 to December 31. The Permit shall not be assigned or transferred.

No Spray

ODOT will refrain from applying herbicides to the location specified in the Permit. The permittee shall control all vegetation in the specified location, including noxious weeds, by cutting, mowing or hand pulling in lieu of chemical treatment. If permittee fails to control vegetation, the Oregon Department of Transportation may remove the vegetation, and the removal could include the use of herbicides.

Vegetation Maintenance Provisions

Cut or mow back all grasses and non-woody vegetation for a distance of eight feet from edge of pavement and maintain during the growing season.

Control all undesirable roadside brush from edge of pavement to right of way line.

Unless specified in the special provisions, no deciduous trees and or shrubs over three feet in height or conifers of any size shall be cut, pruned or removed from the work site.

All noxious weeds listed in the Oregon Department of Agriculture Noxious Weed Policy and Classification System shall be removed.

I certify that I understand and will abide by the terms of the provisions of the Vegetation Control Application.
